**A truly unique
Japanese
Immersion
Kindergarten**

Immersive Japanese Language Education

We provide daily Japanese language education in small groups, with all instruction conducted entirely in Japanese. After just two years, many children become bilingual and confident in both languages.

Imagination and creativity

Our approach is truly unique. Children sing songs accompanied by live piano performances, and storytime is brought to life through kamishibai (paper theater) and puppet shows that spark their imagination. We place a strong emphasis on creative arts and hands-on projects and activities to inspire self-expression and innovative thinking.

Physical Development

We believe in a holistic approach to physical education, focusing on both exercise and healthy eating habits. Children enjoy daily outdoor playtime in our spacious natural field and gym. Our unique P.E. program is held once a week. Additionally, we teach the importance of nutrition through hands-on farming and cooking activities, and encourage good hygiene by brushing teeth after lunch.

Japanese Discipline

Our school emphasizes the importance of traditional Japanese discipline, focusing on respect, responsibility, and perseverance. We teach children to develop good manners, follow routines, and work harmoniously with others. By encouraging independence and self-control, we nurture a sense of community and personal accountability, helping children build a strong foundation for their future.
